

Ice Cream Cone Bird Feeder

Here is what you will need:

- Sugar Cones
- Cheerios
- Bird Seed
- Peanut Butter (or alternative nut butter)
- Yarn or String

First, you will need to cut the very tip off of the ice cream cone. I just gently broke the tips off of mine but you could also do this with a knife. Next, thread a piece of yarn through the hole and make a knot at the end.

Next, thread some cheerios onto the string. You can do as many or as few as you'd like. I love how it looked with the majority of the string covered in cheerios!

Spread some peanut butter (or nut butter alternative) onto the ice cream cone.

Roll the ice cream cone around in bird seed until it is completely covered.
