Sequined Milk Jug Bird Feeder

Here's how to make a Sequined Milk Jug Bird Feeder:

Materials

- Empty Milk Jug
- Twine or String
- Sequins or Glitter
- Craft Paints
- Paint Brush
- Tacky Glue
- Paper Plate
- Wooden Dowels or Twigs
- Scissors or Exacto Knife
- Bird seed

Instructions

1. Start with an empty, clean milk or water jug.

2. Use the razor knife to cut a small X on each side of the milk jug.

3. Slide the wooden dowels or twigs through from one hole to the opposite hole. These are the perches!

4. Cut a rectangle out above each perch.

5. Glue sequins or glitter and paint as desired.

6. Cut a hole in the cap and thread the twine through.

7. Fill the bottom of the feeder with seed, screw the cap back on and hang!
8. TIP* It is easier to fill the feeder from the top than the sides.
