

Frisbee Fun

Introduce your child to the world of kite-flying with Kite Frisbee. Toss a Frisbee at a kite in flight to see if you can hit it! It's a great and challenging game for a windy day at the beach or the park. Your child will get to practice her throwing skills, kite flying skills, and hand-eye coordination.

What You Need:

- Kite
- Frisbee
- A windy day

What You Do:

1. Invite your child to get her kite up in the air.
2. Help her lower it until it's about 20 feet off the ground. Either hold it for her or tie it to something heavy to keep it from flying off.
3. Hand her the Frisbee and encourage her to toss it at the kite! It sounds easy enough, but it's a little more difficult since the kite is weaving around the air!
4. Every time your child hits the kite, give her a point! This game is fun for a windy day at the park or beach.
